OCULISTS AND AURISTS.

DURING MY LATE VISIT TO EUROPE, I OBIAINED several new instruments of incalculable value in my peciality—Demarrés opthalmoscope, which enables the equilist to look into the interior of the eye and see the optionerre and retins in amaurosis, and the lens in incipient calaract: the equally extraordinary speculum for looking into the drum of the ear, the eustachian tubes and throat; Jacob's needles for removing catract, without pain or danger: the regulator for squinting; artificial typmani, for instantly restoring hearing, where the drum of the ear is perforated or lost; artificial eyes, which look and move exactly like the natural, &c. After twenty years' extensive practice and experience, winchpally in this city, and my recent observations during my foreign tour, I trust it will not be deemed unbecoming in me to say that I consider myself competent to treat all those who may place themselves under my care skilfully, and to extend to them every advantage that can be obtained in either hemisphere. By means of the new instruments, each case becomes periectly plain and visible. Patients who have been discouraged and wearled travelling from one physician to another, myseconsult me with a positive lassicance, that at all events they will be told with truthfulness what their discouragily is, and whether curable or otherwise. At home from 9 to 11 and from 2 to 4 o'clock daily.

Whig Primary Elections.

Between the hours of 8 and 8 this morning, what remains of the whig party will assemble at the respective Whig Ward Head Quarters, to go through the farce of a primary election. On former occasions, the low comedy of an election was rehearsed with care, and the arrange ments so perfected that, when the ballot boxes were opened, a certain tableaux of names were exhibited that be. already been agreed upon by the party wire-pullers, but this year there will be some confusion among the dramatis persons, owing to the fact that the inspectors were appointed by the respective Whig Ward Committees, and as delegates are to be chosen to the Judiciary, Sena-

were appointed by the respective Whig Ward Committees, and as delegates are to be chosen to the Judiciary, Senatorial, City and County Conventions, it has brought a host of officeseekers into play; all of whom will be out of bed two hours earlier than usual this morning, and busy as bees to elect the delegates most favorable to their views. The "Ins"-A New Party Organization. It is currently reported that a new party is about to take the field, who, according to all accounts, will be very formidable, as it will control a vast amount of elecvery formidable, as it will control a vast amount of elec-tioneering capital and no little money. The story goes that this party is composed of the officeholders, who have combined together for the laudable purpose of keep-ing thomselves in power, and therefore it is preposed to call them, and very appropriately too, the "ins." It appears that there are a number of greedy fellows in the community who hunger and thirst after the flesh-pots of office, and actually hope, in the scrub race that is about to come off, to oust the disinterested and well-meaning gentlemen who now occupy good fat city berths. The officeholders read with grief and indignation the long lat of candidates for city offices published in the Haratio, and determined—good, beautoplet grutlemen that they are—to eactifice themseives for

the good of the community, and again to accept office, just to keep out the aforementioned greedy officeseekers. The "ins," after having mingied their tears in private, agreed to hold a meeting to devise ways and means to carry all the primary elections and buy up the nominations on the latest the primary elections and buy up the nominations. This sum, in ordinary times, is considered amply sufficient to carry all the slections, but owing to the number of candidates now in the field it may not suffice, and there is consequently much tribulation in the camp of the "ins." It was reported that a meeting of the "ins." was to be held last night at Constitution Hall, but our reporter was unable to find their whereabouts. The following is a list of the "ins." Look out for them —

nty Clerk .- Hichard B. Connelly. Street Commissioner—James Purey.
City Impector.—Thos. K. Downing.
Croners.—Wilhelm, O'Donnell, Gamblo, Hilton
Repairs and Supplies.—It. B. Pardy.

The Workingmen's Committee.

The Conference Committee appointed at the late Park meeting of workingmen, met last evening at the Cooper House. The Conference was declared dissolved by the the bad faith of some of the members of the Hope Cha-pel Committee in nominating tickets for county efficers. The Park Committee, which consists of W. Arbuthnot, D. C. Henderson, Wm. West, W. Rowe, and J. J. Brad-shaw, will meet in a few days in furtherance of the object of their appointment, the political organization of the workingmen of the city.

FORTUMER RISCIN PROM BROWNING.—About 4 octoor, on Sunday afternoon, as the Roosevelt street ferry boat was entering the dock at Bridge street, Brooklyn, a cry was raised among the passengers of "A man overboard," and a dark object was presently seen struggling in the water. There was not the least effort on the part of the employés on the boat to save the man, but fortunately there were several boats on the river whose crews, with laudable emulation, endeavored to save the sinking man. Anomera Tenomica Accident with Burning.—Last even-Anomera Thomas Accident with Burning.—Last evening about 8 o'clock, another of those dreadful accidents took place by the explosion of burning fluid. It seems that Mrs. Margaret Lawrence, wife of Stephen Lawrence, residing at 50 James street, in attempting to trim a lamp, held the can containing the fluid too near the light, setting fire to the fluid, causing an explosion. The burning fluid spread itself over her person, burning her face, neck and hands in a shecking manner. The fire was very soon extinguished, and the unfortunate woman was conveyed to the New York Hospital. It is the opinion of the physician she will not survive the lujury, as it seems she inhaled a portion of the burning fluid. Mrs. Lawrence leaves an infant three months old.

Most of the frauds and outrages practised upon emi rants before the construction of the Castle Garden depot can be traced, as a cause, to the prevailing system of granting to runners permits for landing passengers. Though the emigration laws of 1883 plainly enough pro-vides that runners shall not be permitted to board any was both claimed and exercised. It was a matter of com

Their names are Wm. Seebach, Bennet, Dorlan and Swackhamer.

The first trial of this new plan was, in fact, with the Fides, which arrived from Antwerp on Friday last. As soon as the Fides was allowed to pass Quarantine, one of these four officers boarded and accompanied her up to the city. When arrived at Castle Garden, however, not knowing exactly how to act, he left the ship in charge of two of the emigrant squad, and went to report himself to Commissioner Kennedy. It was during his absence that the transferring of twenty of the passengers from the deck of the Fides on board the boat of the runners occurred. How this took place, under the very noses of the commissioners, it is difficult to account for. Either the runners were too strong for the two policemen, or the latter must have been guilty of shameful neglect. The first is the most probable of the two, as it is not likely the runners would pay much attention to the presence of a few policemen.

All complaints for violations of these arrangements are to be filed in the office of Mr. Semier, at the City Hall, who will arrange all the papers, and bring them before the Mayor in proper form.

A careful investigation has elicited some singular facts in reference to the cause of the fire. The following synopsis from the affidavits of witnesses gives some light upon this melancholy affair:—

Ring Shienfield, being duly sworn, says:—i reside at No. 182 West Broadway; I sun a sheemaker; I know bias Jacobs, of No. 35½ Chatham street; I knew bim when he lived in West Broadway; I have made boots for him; some day or two affer the 4th of July, 1855, I met Mr. Jacobs near Fulton market; he took me by the arm, and we went into a public house and took a glass of beer; we then walked along South street, and he asked me how I found my business; I sais I have work to do; Mr. Jacobs said his business was dull, and that to make money in this country, a man must either fail twice or burn out fwice, he said, I could assist him if I would, and he would pay me for it; I teid him that if I could I would, he then said, he was insured on his stock, and that he wanted to burn out, and if I would do it for him he would give me 150, he promised that no one should know anything about it; he further said, it did not suit him to do it, as he wanted to be away, so that he could prove by several people that he was not at the store when the fire broke out; I laughed at him and said I never had done such a thing, nor would I do it for a hundred thousand dollars; Mr. Jacobs then took me by the hand and said, "don't tell any body about it;" he said he knew I was a poor man and that with \$150 I could set up a store, before I parted with him I advised him not to burn out his place; if had known where Mr. Jacobs was insured I would have informed them; but not speaking good. English I let the affair drop, a few days after I had this conversation with Mr. Jacobs my son Abraham came to my house; I told him what Mr. Jacobs had proposed to me to do, he haughed and said "it would be a nice business." on Monday after the fire, Mr. Nathau Fallk, of No. 44 West Broadway, told me Mr. Jacobs said to him three or four weeks before that he would not

sitch him in borning out his (12-12 km) present the fire.

It was further shown that Marcus feeman, the cutter, walked to the Fourth ward station house, assisted by the politic. His dress convisted of a pair of dark settinet pontabons him worden socks, and an old shift; there was carrely any sisceres to the chirt, and the back of it was tern, but it did not oppear burst. The injury on his back appeared more like scales from hot water, and how he received the injury without burning the shirt appears strang, unless it was by caloting.

Mr. Jacobs precured an incurance on his stock in the Hamilton Fire Insurance Company for \$2.000, on the light of June, 1805; also an insurance for the same amount in the National Exchange Insurance Company, burning the same date, making an insurance of \$4.000 on the stock and fartures.

After the fire two appraisers were chosen to setimate the value of the stock. Each article was valued, and the total amounted to \$1,007 at 10 and insurance of \$4.000 on the stock and fartures.

After the fire two appraisers were chosen to setimate the value of the stock. Each article was valued, and the total amounted to \$1,007 at 2. In addition to this amount the appraisers allowed \$200 to cover any total destruction of property which might have taken place. The estimated value of goods saved amounted to \$254 120—thus is valued of allowed the underwriters of \$1,800 91.

some weeks past Mr. Smith has not kept any account

well executed by one who could have had no good opportunity of becoming acquainted with his style of handwriting. The following is a copy of the document:—
